☐ I agree to the [Terms and Conditions](#)

submit

This is the sign up page. User are prompted to enter valid username, email, campus, password for registration- with the possibility of additional information. All information must pass our validation process (ie. No duplicate usernames, NEU email and campus must be valid, password must be secure).

Users also must agree to the Application's Terms and Conditions document, which basically outlines the security, privacy, and data collection/ usage points outlined in our SRS document

The user could then press the arrow to submit the information.

This is the app's home page. User can press the Home sign to send a post for their stuff. They can also search their desired product using filters. On the bottom, some recommendations are listed according to user's searching and purchasing history.

Options Under Home Page

Options Under Home Page

Drop down the left button of Home, users will see options of Order History, My Post, Products, Filter (form), and User Profile. For My Post, there are sub options such as new post, edit my post, sold items, selling items, disabled items, and exits, which will be exhibited later.

New Post & Edit My Post

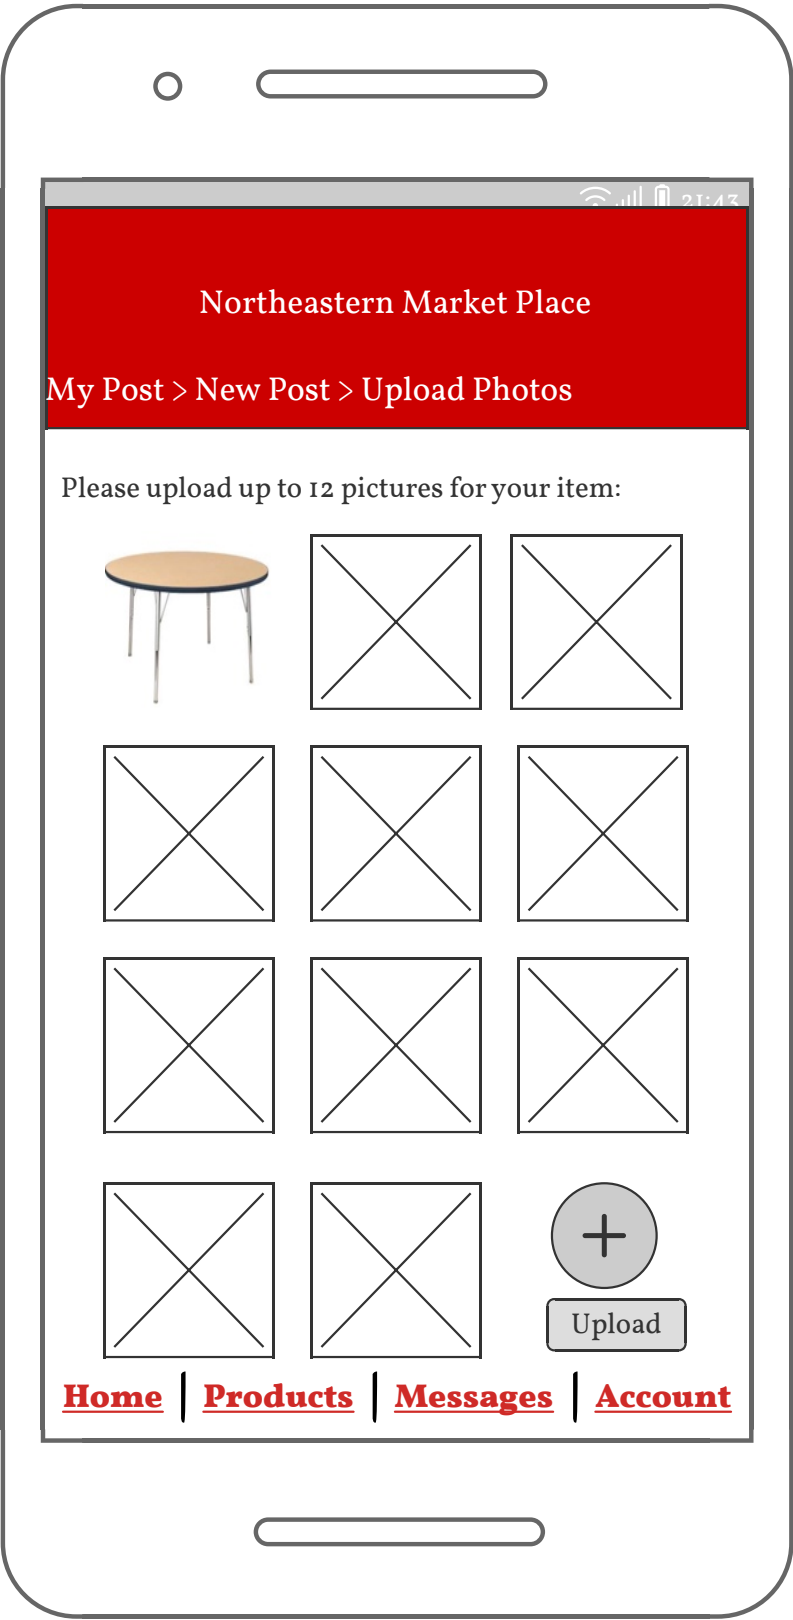

New Post contains

- 1) Product Name
- 2) Description
- 3) Pickup address (hidden, used for calculating distances and locating NEU campus)
- 4) Starting price
- 5) Category: furniture, books, house appliances, sports equipment, and others
- 6) Condition: new, like new, good, acceptable
- 7) Upload photos

Edit Post contains the same options. The default inputs will be the user's previous answers or values. In addition, users can also

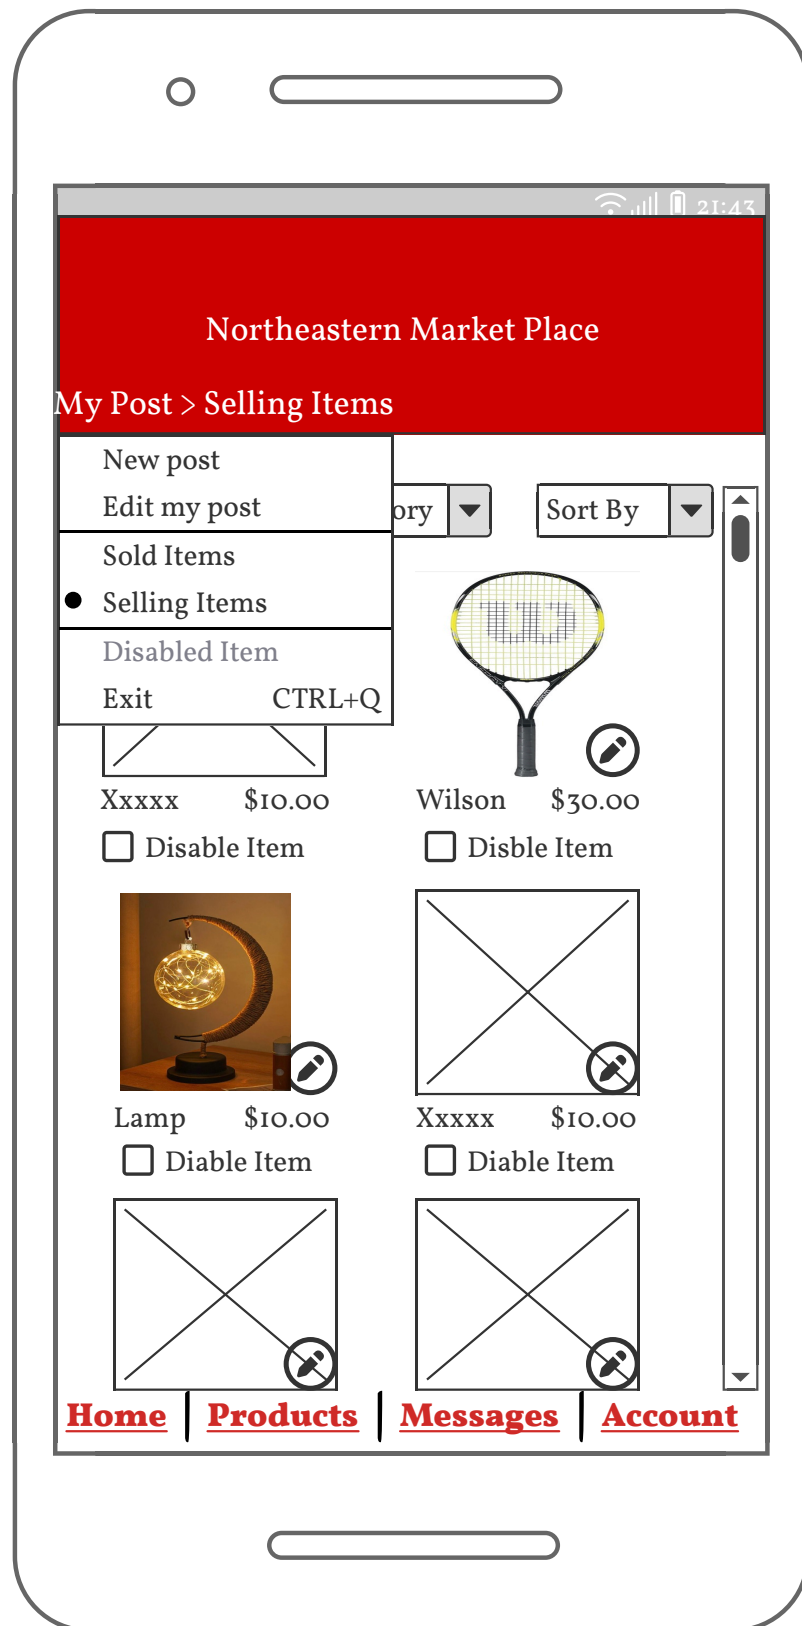

- 1) Mark item as sold
- 2) Delete Post

Upload Photos

Upload Photos

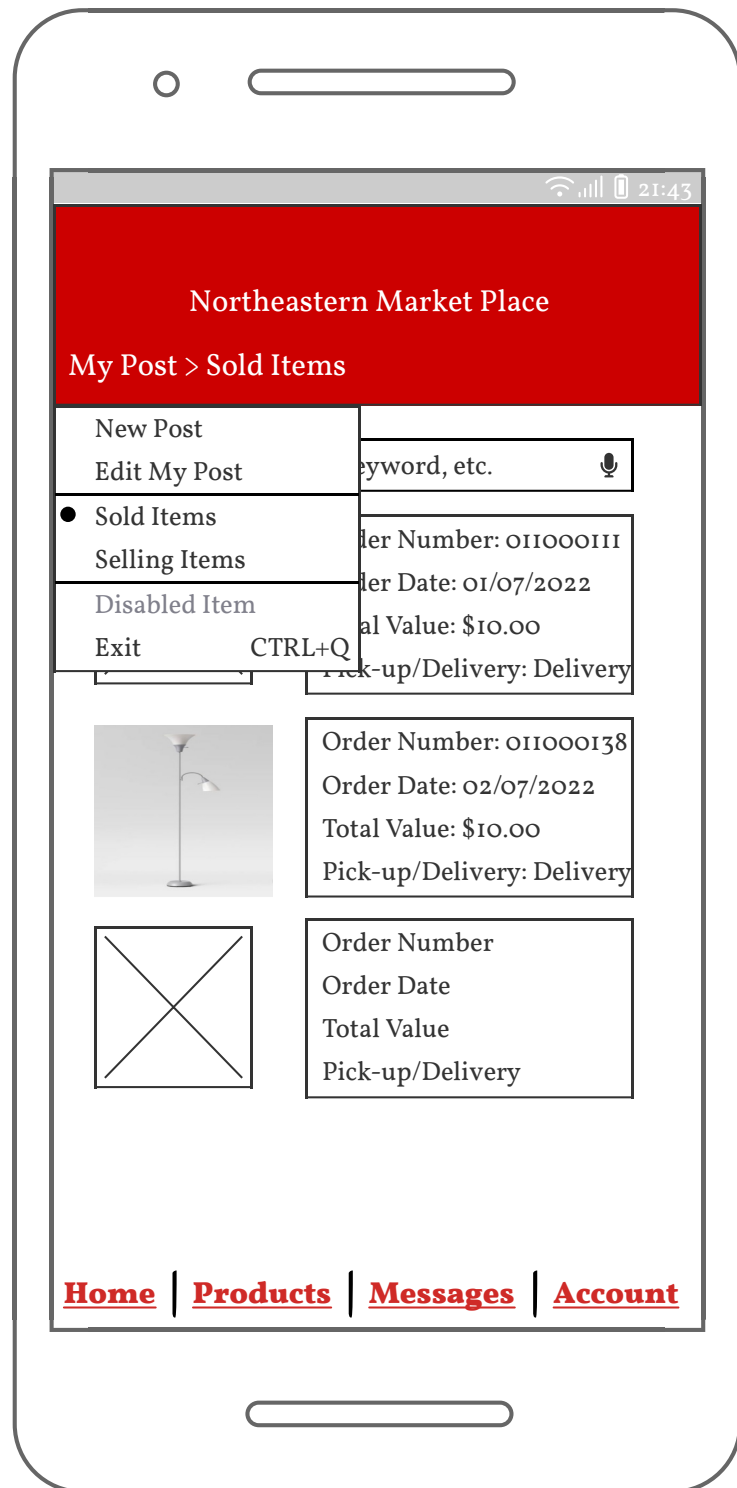

Users can upload up to 12 photos for each sold item .

Selling Items & Disabled Items

It contains a list of selling items. Wireframe refers to product interface. Also, this wireframe can be used for displaying the list of disabled items.

Users can click on the post to access the edit post functionalities.

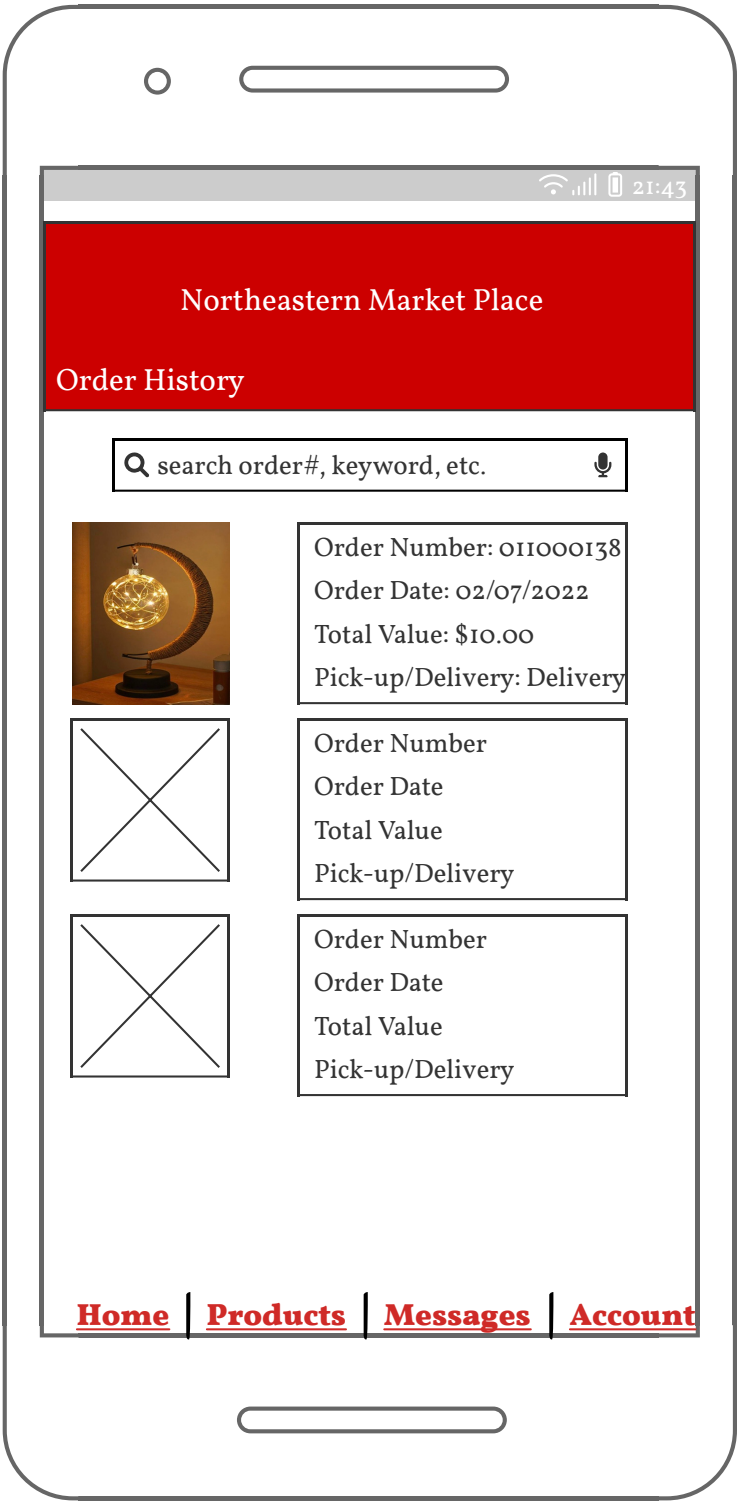

My Post (Sold Items)

It contains

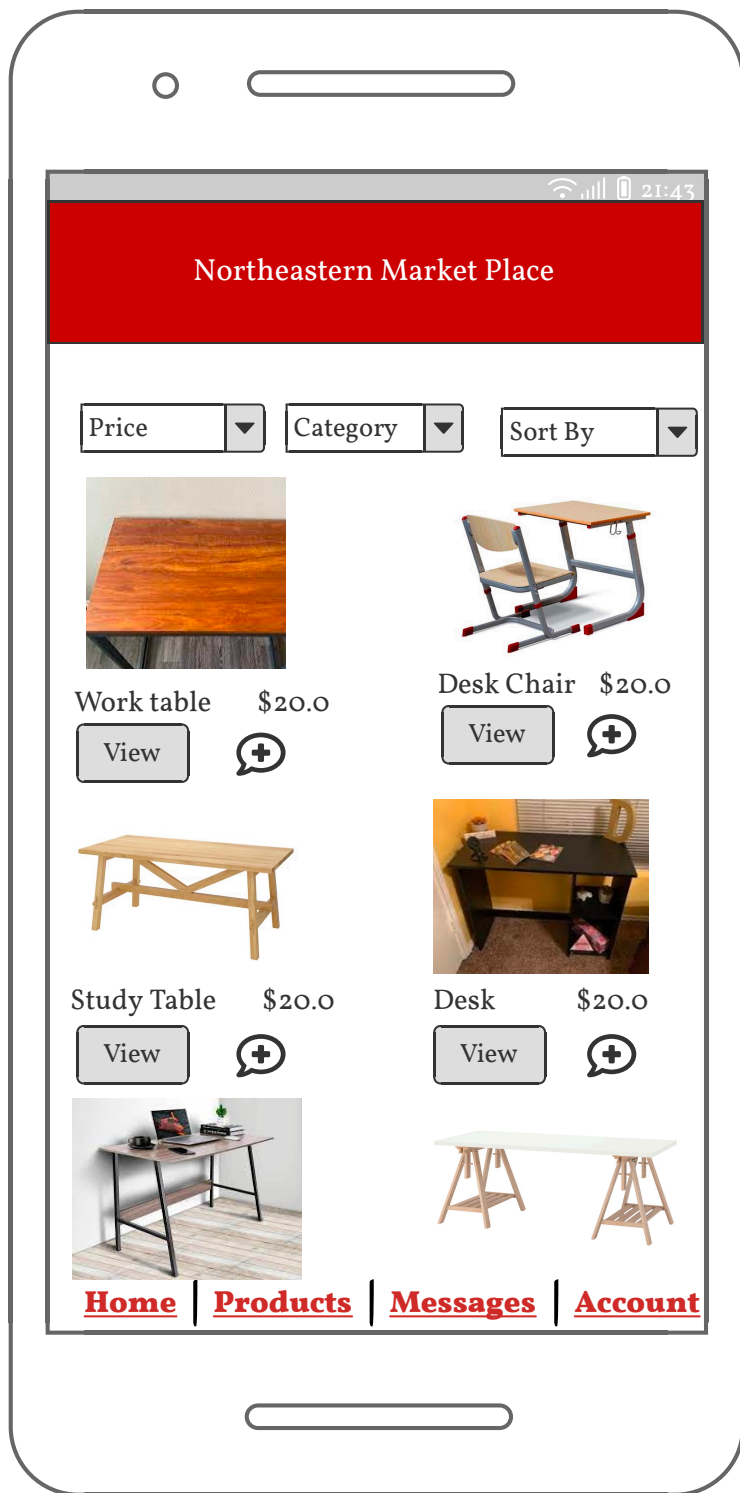

- 1) new post: make a new post
- 2) edit my most: edit an existing unsold post
- 3) sold items: a list of sold items
- 4) selling items: wireframe refers to product interface
- 5) disabled items: a list of items that have not been sold but the seller voluntarily removed from the selling items.
- 6) exit: return to home page

Order History

Order History

It contains the pictures of purchased products, order number, order Date, total value, and the pick-up/delivery options.

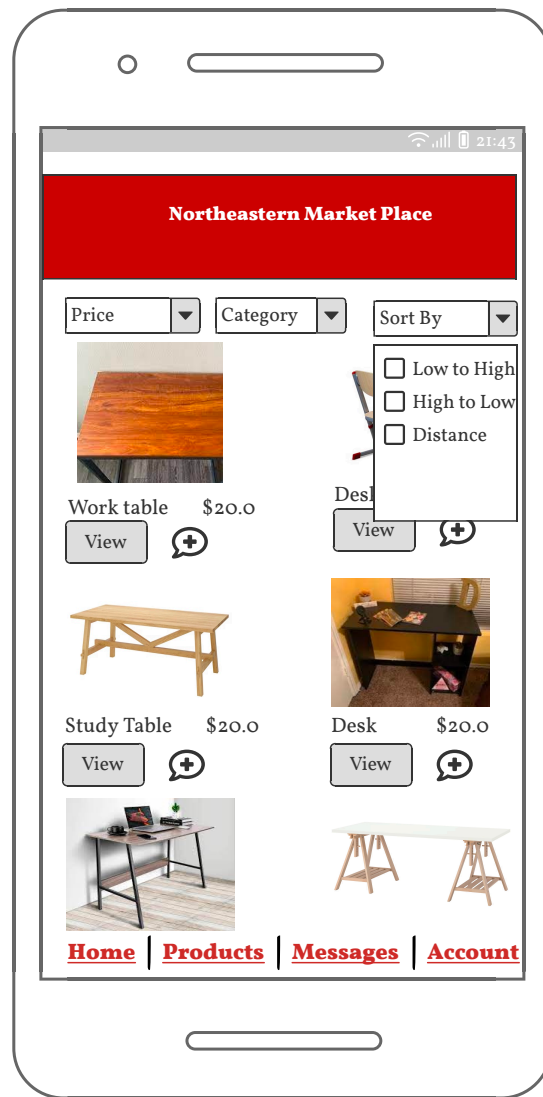

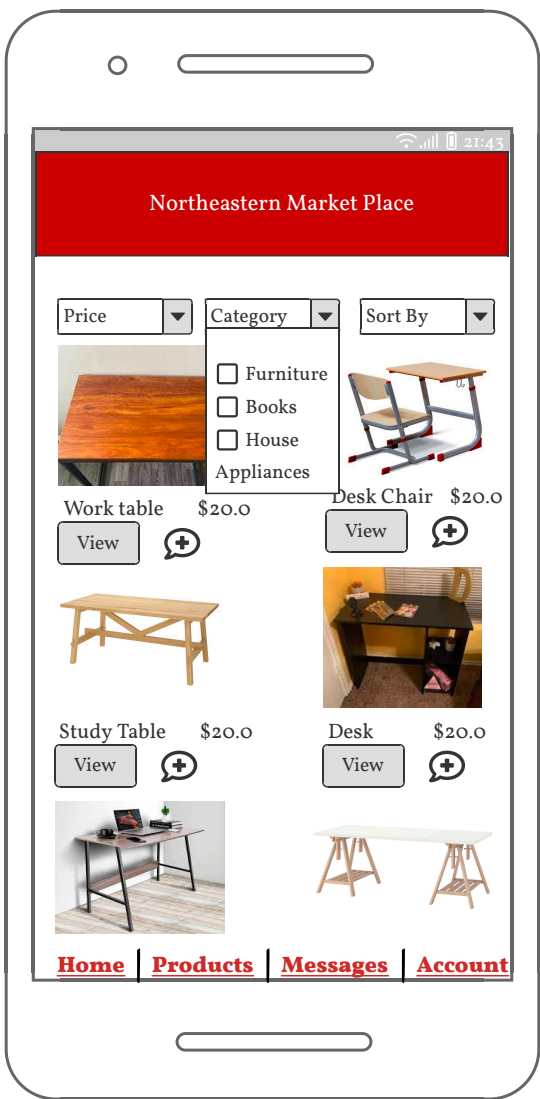

Products Page:

It contains all the products with images, the user can click on view details to view about the product in details. There is a chat button located next to view details. The user can click on that to directly chat with the student who is selling the product.

The user can also filter the products based on

- 1) Price
- 2) Category
- 3) Sort By

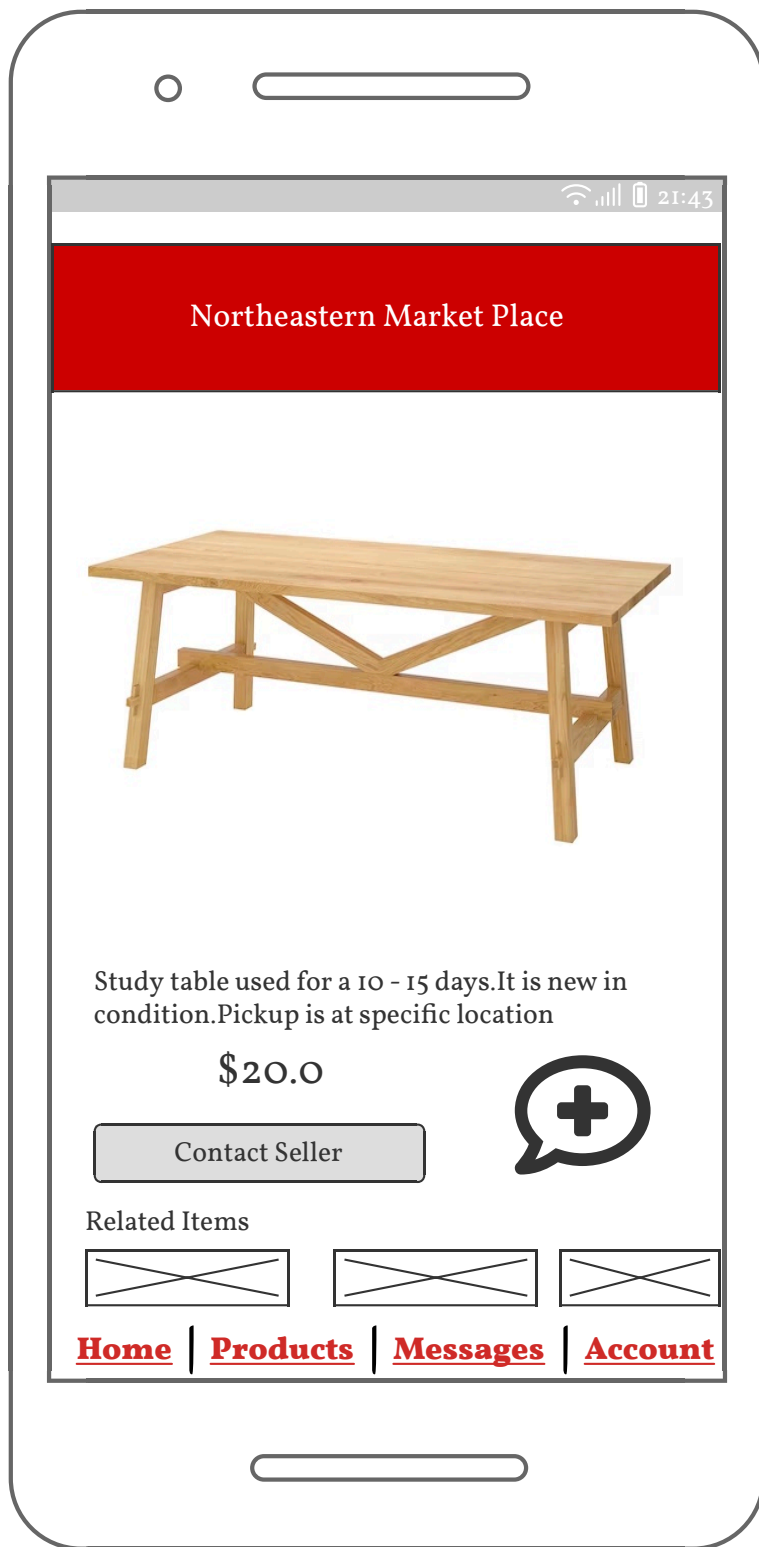

Products Page filter:

It contains all the products with images. In the top there are few filters located for the students to use to sort the list

The user can also filter the products based on

- 1) Price (sort based on the price listed)
- 2) Category (contains categories such as furniture, books, house appliances that students are looking to buy)
- 3) Sort By (It contains sorting based on price and distance of the seller)

Individual Products Page:

It contains a product with images, the user can swipe to view more photos. The user can directly contact the seller to buy the product. Below are few related items for the user to see.

Lana

Hi Allison,
I love this coffee table! Can you
sell for \$18 instead?

Allison

Yay! I am happy you like it!
And yes, 18 is fine, but I need it
gone by Monday! Would that
work?

Today 1:05pm

Lana

Okay! Let's plan on Monday,
does 10:30am work? Where
should we meet?
